

Welcome to SCIEX!

You've joined a company with a strong passion for customers and a commitment to advancing human wellness through the power of precise science. This dedication and innovation is possible thanks to our team of amazingly talented and devoted associates.

Together we pioneer solutions in mass spectrometry and capillary electrophoresis to help our customers protect the global food supply, advance life-saving medicines, and support early detection and treatment of life-threatening diseases. As part of the SCIEX team you will help scientists around the world find the answers they need to positively impact lives.

Beginning your first day, we will make every effort to support you and create an environment in which you will thrive and grow. You can expect your manager to provide you with a complete onboarding plan that will help prepare you for your role and set you up for a successful career journey at SCIEX. We will also pair you up with a Buddy – a SCIEX associate who you can feel comfortable going to with any questions about our culture and your new role.

As I reflect on my own career journey at SCIEX, it's the people I've worked with who have made a lasting impact on me. I wouldn't be in the position I am today without their ongoing support, so I encourage you to network and meet people across the business. Whether it's scheduling an informal coffee chat or a virtual meet-and-greet, we're here to welcome you with open arms and support your growth.

To learn more about us, I encourage you to visit our [talent site](#). It offers information about our culture, team, products and solutions. Take the time to explore this site and reach out to your recruiter or hiring manager with any questions or concerns.

We are excited that you are now part of our team and wish you the best of luck in your new role.

Welcome to the team once again and thank YOU for choosing SCIEX!

A handwritten signature in black ink that reads "Joe".
