

Warehouse Safety & Recruitment | Kohl's

Video (2:12)

[Music]

The job isn't too hard and the supervisors make everything pretty easy. They're pretty easy to talk to. All of them are really nice and friendly.

Kohl's just value its people.

Kohl's has done, to me, everything that they need to do to keep us safe.

Depending on the associates, you all partake in the various activities to ensure that our customer's orders are accurate.

Bringing merchandise in, there's also a sortation process, and a packing process, and a shipping process.

Of course, it is a warehouse, so you will be standing on your feet for around ten hours a day.

Here, none of our items are too heavy. None of our packages really are heavy because it's really pretty much clothes and shoes, and different items like that.

We really care about our associates. If something was to happen due to Covid, we really take that to heart.

[Music]

They just all around have tried to look out for us during Covid.

I use the Wellness Center all the time. There is a licensed Nurse Practitioner there. You can bring your whole family in, whoever lives with you, and it's free of charge.

I tell all of my training classes to just go out there and keep a positive mindset. We are all here to help each other out.

Come with a great attitude. Get ready to have fun. Get ready to get thanked.

Just give Kohl's a try. It's worth it.
